OHIO INCIDENT-BASED REPORTING SYSTEM

DATA COLLECTION AND SUBMISSION SPECIFICATIONS

March 2017

ACKNOWLEDGMENTS

The Incident-Based Reporting (IBR) design staff wishes to express its appreciation to the many people in law enforcement – the Federal Bureau of Investigation, Bureau of Justice Statistics, the Association of State Uniform Crime Reporting Programs, the International Association of Chiefs of Police and the National Sheriff’s Association, who have worked to make the National Incident-Based Reporting System (NIBRS) a success. In particular, we would like to thank the representatives from police and sheriffs’ departments who have given us the benefit of their experience and expertise in the development of this system. Special thanks to the Ohio NIBRS Advisory Board, the three regional reporting centers in Ohio – CRIS (now REDSS), NORIS, and RCIC, the Ohio NIBRS Pilot Group, and the State of New York, Division of Criminal Justice Services – whose help in the development of Ohio’s IBR program has been immeasurable.

We also acknowledge the support of the Bureau of Justice Statistics (BJS), U.S. Department of Justice in the development of these specifications. The development of the Ohio Incident-Based Reporting System was supported by a \$560,119 grant (Grant No. 89-CX-K023) awarded by the Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice. The points of view or opinions expressed in this document are those of the authors and do not necessarily represent the views of the U.S. Department of Justice or any other agency.

Today, the OIBRS Advisory Board continues to be a valuable resource for the program’s data collection guidelines.

INTRODUCTION TO THE MANUAL

This document provides the information necessary for local law enforcement agencies and the regional reporting centers to participate in Ohio's Incident-Based Crime Reporting (IBR) System. This edition includes an overview of the IBR system, the data elements and values, the data submission specifications, and the data edits. Also included are several appendices. Among these are an ORC Offense Look-Up Table and the FBI Hate Crime Reporting Specifications.

UCR AT THE NATIONAL AND STATE LEVEL

Crime reporting originated in the 1920s. Recognizing the nation's need for statistics on crimes reported to the police, the International Association of Chiefs of Police (IACP) implemented a voluntary national data collection effort. The effort was developed by the committee on Uniform Crime Reports of the IACP.

Further progress toward a national crime-reporting program was made in 1930 when the United States Attorney General designated the FBI as the agency responsible for the Uniform Crime Reporting (UCR) program. The UCR program was designed to simply tally a limited number of offenses.

With federal assistance, many states developed UCR programs that served as intermediaries between local law enforcement and the FBI. The State of Ohio established a UCR program in 1976. The program remained in place until 1981 when its cancellation was dictated by state budget. Since that time local law enforcement agencies have returned to the old practice of submitting UCR information directly to the FBI.

In 1989, 337 of Ohio's police agencies and 57 sheriffs departments submitted UCR information directly to the FBI. Data are submitted on eight Part I crimes. These include the offenses of murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson. Approximately 470,000 Part I crimes were reported in the United States in 1989. In addition to the Part I crimes, some agencies also submit data for 20 Part II offenses and supplementary data on homicides, domestic violence, and law enforcement officers killed and assaulted in the line of duty.

SIGNIFICANCE OF UNIFORM CRIME REPORTING

The UCR program is significant for several reasons. The program collects crime and arrest information from over 16,000 law enforcement agencies in the nation. Since offenses are defined differently from state to state, UCR allows for a standard means of communicating crimes and police response to crimes. After more than 70 years of use, UCR data have become the crime "language" of law enforcement, elected officials, policy makers, and the media when communicating crime information to the public.

The UCR program has remained virtually unchanged since its development in the 1930s. The need for crime data has increased steadily over the past 70+ years. In the late 1970s, the law enforcement community initiated a study of the UCR program with the objective of meeting law enforcement needs into the 21st century.

The Bureau of Justice Statistics (BJS) funded the study of UCR. The recommendations of that study were published in 1985 as the "Blueprint for the Future of the Uniform Crime Reporting Program." As a result of this study, the FBI and the BJS began to develop the new incident-based reporting system in January of 1986. With the help of several national law enforcement associations and various federal, state, and local criminal justice agencies, the FBI published the final requirements for the National Incident-Based Reporting System (NIBRS) in the autumn of 1988.

INCIDENT-BASED REPORTING IN OHIO

Ohio began work to reestablish its UCR program in 1986. The program consists only of incident-based reporting. After gaining the support of the Ohio Association of Chiefs of Police (OACP), the Buckeye State Sheriffs' Association (BSSA), the Ohio State Highway Patrol/LEADS (OSHP), and the Bureau of Criminal Identification and Investigation (BCI&I), the Office of Criminal Justice Services (OCJS) applied for a federal grant from the Bureau of Justice Statistics (BJS) to fund Ohio's IBR implementation. BJS awarded Ohio a \$560,000 grant in July of 1989.

In late 1989, the OCJS and the BCI&I began to develop Ohio's IBR system. Two groups were established to assist with this development process: the Ohio NIBRS Advisory Board (Spring 1989) and the Ohio NIBRS Pilot Group (Fall 1990). The Advisory Board is comprised of one member from OCJS and nine others from various law enforcement entities throughout the state. Representatives from Ohio's three Regional Crime Reporting Centers also sit on the board as advisors. The Ohio NIBRS Pilot Group was comprised of 25+ local law enforcement and sheriff agencies throughout the state.

Both of these groups have assisted in developing the data requirements and data submission specifications, and a model incident report form for the collection of IBR data.

WHAT IS INCIDENT-BASED REPORTING?

The FBI has defined an incident as follows:

An **incident** is defined as one or more offenses committed by the same offender, or group of offenders acting in concert, at the same time and place.

The concept of **acting in concert** provides: that the offenders actually commit or assist in the commission of crime(s). The offenders must be aware of, and consent to, the commission of the crime(s); or even if nonconsenting, their actions assist in the commission of the offense(s).

The concept of **same time and place** provides: If more than one crime was committed by the same person or group of persons and the time and place intervals separating them were insignificant, all of the crimes make up a single incident.

NIBRS is a significant improvement over the UCR summary system. In NIBRS, information describing each reported crime or arrest is submitted as part of a unit record with its own incident number. Each unit record contains information on up to 10 offenses that occurred during an incident. Also included is detailed information on property, victims, offenders, and arrestees. This allows for the unique preservation of the details and relationships of each incident.

NIBRS is an automated (computerized) system as opposed to the UCR tally (table) system. Computerization of crime data will provide the capability to collect and analyze the large volume of crime and arrests that occur in our nation.

The major differences between the old UCR (Summary) and the new UCR (NIBRS) system are:

- NIBRS involves a greater detail of reporting. Information is collected on 53 separate pieces of data surrounding the incident.
- Offenses and Arrests are linked in NIBRS.
- There is no Hierarchy Rule in NIBRS. Information is collected on up to 10 most serious offenses in an incident.
- NIBRS involves expanded offense reporting (from eight "index" offenses to 46 in NIBRS)
- NIBRS uses Revised and New Offense definitions.
- NIBRS provides a means for distinguishing "Attempted" versus "Completed" crimes.
- NIBRS includes data elements for victim/offender relationships, victim, offender, and arrestee characteristics, crime location, weapon involvement, and drug/alcohol involvement.

OHIO IBR ENHANCEMENTS

The Federal NIBRS requirements were developed not only as a reporting standard, but also as a model from which state UCR programs could work to develop their own IBR systems. As indicated by the FBI, NIBRS data is to be generated as a by-product of state and local incident-based reporting (IBR) systems. This means that a state or local agency may build its IBR system to suit its individual needs. For example, it can have a different file structure than that used by the National UCR IBR Program and include additional data elements and values. However, in Ohio's case when it is time to report to the National UCR IBR Program, the state should extract from its IBR system only the data required by NIBRS and in the NIBRS format for submission to the FBI.

Enhancements in Ohio's IBR system include:

- Offenses are recorded using the Ohio Revised Code with conversion to NIBRS at the state level. This will allow local agencies a greater level of detail on offenses and will improve reliability and utility of the data.
- Ohio IBR collects information on up to 10 arrest charges – the FBI is only collecting data on the most serious arrest charge in an incident.
- Ohio has expanded codes for several federal IBR data elements (location type, method of entry, case clearances, weapon type, property description, drug type, and arrest type). All codes will be translated to the appropriate NIBRS code at the state level.
- Ohio IBR has additional data elements. These include greater victim, offender, and arrestee detail, and a method of operation data element.

BENEFITS OF PARTICIPATION

IBR systems are an indispensable tool in the war against crime. They allow one to identify with precision when and where crime takes place, what form it takes, and the characteristics of property involvement, victims, and offenders. Armed with such information, law enforcement can better explain the need for resources. And, after obtaining the necessary resources, law enforcement will be able to utilize them in an efficient and effective manner. Ohio's IBR system will provide this tool because it is capable of producing more detailed, accurate, and meaningful data than produced by the traditional UCR program.

The NIBRS is the first explicitly computer-based and standardized reporting system in law enforcement. Automated record systems are well underway at the local level. Many local law enforcement agencies have already made this change. Also, in those agencies with manual systems, most of the IBR information is already recorded on the offense report form.

Participation in Ohio's IBR program will allow for a better system suited to meet planning, resource allocation, and use for the state and local agencies. It will also allow Ohio law enforcement agencies and policymakers to speak the same "language" in discussing and analyzing crime.

REQUIREMENTS OF PARTICIPATION

Full participation in Ohio's IBR system requires data processing capabilities as outlined in this manual. Participation should not place any significant new burden on officers preparing incident and arrest reports as most of the required data is already being entered on the reports. However, since the data are detailed, increased data entry and data processing burdens may be involved. IBR data submission files can be submitted via e-mail. Contact the Ohio IBR program at OCJS by calling (614) 466-7782 for the e-mail address information where to submit the data. Departments submitting incident data for other law enforcement agencies must forward a list of ORIs to OCJS of all agencies for which they will be submitting. A separate file for each agency under the specific agency's ORI must be submitted. Multiple ORIs in one submission file will not be accepted.

Ohio will **NOT** accept data in NIBRS format from local agencies, since Ohio IBR differs in several ways from NIBRS. The FBI will not accept IBR data directly from local agencies in Ohio. All IBR data from Ohio must be forwarded to the FBI through the Ohio IBR program at the Ohio Office of Criminal Justice Services.

USE OF FORCE INCIDENT REPORTING IN OHIO

In 2017, Ohio established its data collection guidelines for reporting use of force incidents through Ohio's IBR program, using the same technical concepts. Ohio established its standard using the FBI's national use of force data collection program as the foundation. The OIBRS Advisory Board was a significant contributor in the determination and approval of data elements and values that are reported to the Ohio IBR program. The state will electronically extract from its IBR system only the data required by the FBI's use of force data collection program and also in the format allowed by the FBI's program.

Ohio's IBR program defines a Use of Force incident for state reporting purposes as follows:

A use of force incident to be reported through OIBRS is defined as an incident when a law enforcement or corrections officer uses any empty hand technique on a person, uses a less than lethal weapon or other object used as a less than lethal weapon on a person, discharges a firearm at or in the direction of a person, or uses any other lethal weapon or object used as a lethal weapon. Empty hand techniques do not include standard handcuffing procedures on a compliant person or escort position to a vehicle or holding area. This data collection to the Ohio IBR program does not include un-holstering a firearm and pointing it at a person or displaying any other type of lethal or less than lethal weapon or device.

Although the Ohio IBR program defines what is collected at the state level for statistical reporting purposes, law enforcement agencies can collect use of force incident data for more scenario types based on what their individual agency policies require.

This data collection defines a law enforcement officer by using applicable portions of the FBI's Law Enforcement Officers Killed and Assaulted (LEOKA) program criteria as the guideline.

- Law enforcement officers who meet all of the following criteria:
 - Wear/carry a badge (ordinarily)
 - Carry a firearm (ordinarily)
 - Be duly sworn and have full arrest powers
 - Be a member of a public governmental law enforcement agency and be paid from government funds set aside specifically for payment to sworn law enforcement
 - Be acting in an official capacity, whether on or off duty, at the time of incident

- Exceptions to the above-listed criteria:
 - Individuals who are serving as a law enforcement officer at the request of a law enforcement agency whose officers meet the current collection criteria
 - Special circumstances will be reviewed on a case-by-case basis to determine inclusion

SECTION I
DATA ELEMENTS AND VALUES

ADMINISTRATIVE SEGMENT

Enter an Administrative Segment (Data Elements #1-#8, #70-#77, and #106) for each reported incident.

NOTE: The data elements marked with an asterisk (*) represent the information that must be submitted for each offense incident. Depending upon the circumstances of the offense incident, other data elements may be required.

Only one Administrative Segment should be submitted for each offense incident and each use of force incident.

DATA ELEMENT # 1**ORI NUMBER*****DATA FORMAT:** 9 Characters Alpha/Numeric**CODING STRUCTURE:** Enter the 9 character NCIC Originating Agency Identifier (ORI) Number that has been assigned to each agency.

All ORI Numbers must begin with "OH".

DATA ELEMENT # 2**AGENCY INCIDENT NUMBER*****DATA FORMAT:** 12 Characters Alpha/Numeric**CODING STRUCTURE:** Enter the number assigned by the submitting agency to uniquely identify the incident. This number must be the same for all segments associated with the incident. If the Incident Number is less than 12 characters, leave trailing characters blank.**EXAMPLE:**

123456789bbb (where bbb = blanks)

DATA ELEMENT # 2A**CARGO THEFT****DATA FORMAT:** 1 Character Alpha**CODING STRUCTURE:** This offense-specific coding is necessary to indicate whether or not the incident involved a cargo theft.

The cargo theft identifier must be entered only if the ORC Offense Code (Data Element #9) requires it. See the Implied Edits section to locate the ORC Offense Codes that require this entry. Otherwise, leave blank.

For FBI IBR reporting purposes only, cargo theft is defined as the criminal taking of any cargo including, but not limited to, goods, chattels, money, or baggage that constitutes, in whole or in part, a commercial shipment of freight moving in commerce, from any pipeline system, railroad car, motortruck, or other vehicle, or from any tank or storage facility, station house, platform, or depot, or from any vessel or wharf, or from any aircraft, air terminal, airport, aircraft terminal or air navigation facility, or from any intermodal container, intermodal chassis, trailer, container freight station, warehouse, freight distribution facility, or freight consolidation facility. For purposes of this definition, cargo shall be deemed as moving in commerce at all points between the point of origin and the final destination, regardless of any temporary stop while awaiting transshipment or otherwise.

POSSIBLE ENTRIES:

Y Yes, the incident involved a cargo theft.

N No, the incident did not involve a cargo theft.

NOTE: If multiple offenses occurred within an incident and one was associated with a cargo theft, then Y = Yes must be entered.

DATA ELEMENT # 3**INCIDENT DATE/TIME***

DATA FORMAT: 12 Characters Numeric

CODING STRUCTURE: The Year, Month, Day, and Time when the incident occurred or the beginning of the time period in which it started (when appropriate). The time should be recorded according to military standards. If the exact date and time of the incident is unknown, enter the beginning date and time period in this data element and the ending date and time period in the Data Element #4 (Report Date/Time).

NOTE: If the Incident Date and Time is unknown, enter the Report Date/Time.

The Incident Date cannot predate 01/01/1991. Any Incident Date prior to 01/01/1991 is invalid since the National IBR program began accepting IBR data on this date.

“2400” is not a valid time. 12 a.m. should be entered as “0000”. If “0000” is entered, the submitting agency should be careful that the Incident Date is as if the time was one minute past midnight.

POSSIBLE ENTRIES:

Year-Month-Day-Time YYYYMMDDTTTT

EXAMPLES:

Example 1: If a robbery occurred at 9:30 p.m. on July 2, 2003, the entry should be “200307022130”.

Example 2: If a burglary occurs sometime between 11:15 a.m. on June 24, 2003 and 4:30 p.m. on June 26, 2003, when the victim reports the incident to the police, the entry for Data Element #3 should be “200306241115” and Data Element #4 Report Date/Time should be “200306261630”. Together, Data Elements #3 and #4 define the beginning and ending date and time for this incident.

Example 3: A corpse riddled with bullets is discovered and reported to the police at 6:00 a.m. on January 17, 2003. Since no other information about the time of death will be available until the autopsy is completed, the entry for this data element should be “200301170600” and Data Element #4 Report Date/Time should be “200301170600”. Once a more specific time of death is determined, the entry for this data element should be updated to reflect the coroner’s determination of the date and time when the murder occurred.

Example 4: A woman reported that her purse was stolen at 12:15 a.m. on July 14, 2003. The entry for this data element should be “200307140015”.

DATA ELEMENT # 4**REPORT DATE/TIME***

DATA FORMAT: 12 Characters Numeric

CODING STRUCTURE: This is the Year, Month, Day, and Time the incident is reported to the police. In most cases this will be the same as the Incident Date/Time (Data Element #3). However, if the incident occurs over several hours or days, then the Report Date should serve as a delimiter for the end of the incident. When recording the Report Time, military standards should be utilized.

NOTE: “2400” is not a valid time. 12 a.m. should be entered as “0000”. If “0000” is entered, the submitting agency should be careful that the Report Date is as if the time was one minute past midnight.

POSSIBLE ENTRIES:

Year-Month-Day-Time YYYYMMDDTTTT

EXAMPLES:

Example 1: A robbery takes place on a street corner at 10:45 p.m. on July 25, 2003. The victim phones the police and they arrive on the scene and complete an incident report at 11:00 p.m. The entry for Data Element #3 should be “200307252245”, while Data Element #4 Report Date/Time should be “200307252300”.

Example 2: A burglary occurred sometime between 11:15 a.m. on June 24, 2003, and 4:30 p.m. on June 26, 2003, when the victim reported the incident to the police, the entry for Data Element #3 should be “200306241115”. Data Element #4 Report Date/Time should be “200306261630”, and together, Data Elements #3 and #4 define the beginning and end date and time of this incident.

DATA ELEMENT # 5	CASE CLEARANCES
-------------------------	------------------------

DATA FORMAT: 1 Character Alpha

CODING STRUCTURE: Enter one of the Case Clearances listed below. If none apply, leave this field blank.

NOTE: All Case Clearances should be applied at the incident level. In a multiple offense incident, the clearance of one offense clears the entire incident. If a case is exceptionally cleared, there should not be an arrestee segment submitted, but the suspect segment must be complete with no unknown entries. If an incident may be cleared by either an exceptional clearance or an arrest, the arrest should be given a higher priority. If a case is cleared by arrest and a second offender is later arrested in conjunction with the cleared incident, a second arrestee segment should be added to that incident, but the clearance information does not need to be updated. **Do not update information on exceptional clearances.**

Standards for an Exceptional Clearance:

In order to clear an offense by exceptional means, the following four conditions must be met: (1) the investigation must have clearly and definitely established the identity of at least one offender; (2) sufficient probable cause must have been developed to support the arrest, charging, and prosecution of the suspect; (3) the exact location of the suspect must be known so that an arrest can be made; and (4) there must be a reason outside the control of law enforcement which prevents the arrest, i.e. “A” through “E” below:

POSSIBLE ENTRIES:

EXCEPTIONAL CLEARANCES

- A **DEATH OF OFFENDER** – Applicable when the suspect has committed suicide, is the victim of a murder, has made a “deathbed confession,” is killed by the police or a citizen, or has died due to another cause.

- B **PROSECUTION DECLINED** – By the prosecutor for other than lack of probable cause. For example, the case is cleared by the confession of an offender already in the custody of the arresting agency or currently serving a sentence in jail or prison. Another example is when the offender is being prosecuted in another jurisdiction by local, state, or federal authorities for different offenses in question and the other jurisdiction will not release him/her.

- C **IN CUSTODY OF OTHER JURISDICTION** – Used when the authorities of another state or country refuse to remand the suspect to the custody of the jurisdiction that wishes to prosecute him/her for the

offense in question, or in circumstances where an agency arrests an offender who is also suspected of committing offenses in other jurisdictions.

- D **VICTIM REFUSES TO COOPERATE** – Applicable when the victim of an offense fails to cooperate in the prosecution of the suspect.
- E **JUVENILE/NO CUSTODY** – Used when a juvenile suspect is handled without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense.

ARRESTS

- F **CLEARED BY ARREST – ADULT** – An offense is “cleared by arrest” when at least one person is arrested and charged with the commission of an offense (whether following arrest, court summons, or police notice). In incidents involving multiple arrests, this code is used if at least one of those arrested is 18 years of age or older.
- G **CLEARED BY ARREST – JUVENILE** – Same as above. Additionally, although no physical arrest is made, a clearance by arrest can be claimed when the offender is under 18 years of age and is cited to appear in juvenile court or before other juvenile authorities. In incidents which involve multiple arrests, this code is used when all those arrested are under 18 years of age.

OTHER CLEARANCES

- H **WARRANT ISSUED** – Applies when an arrest warrant is issued for a particular suspect, but has not yet been served, and the final disposition of the case depends on the suspect being arrested.
- I **INVESTIGATION PENDING** – Appropriate when the final disposition of the case depends on the completion of some aspect of an investigation that is currently being pursued.
- J **CLOSED** – Applicable when a case is deemed inactive for reasons of unsolvability, elapsed time since occurrence, etc.
- K **UNFOUNDED** – Applicable when through investigation an incident is found to be false or baseless.
- U **UNKNOWN** – Applies when information regarding the disposition of the case is not available.

EXAMPLES:

Example 1: A 30-year-old suspect commits a burglary and is subsequently arrested. The proper code should be “F” (Cleared by Arrest – Adult).

Example 2: A homicide investigation is cleared when the person wanted for murder is discovered dead on August 30, 2001. The entry for Data Element #5 should be “A” (Death of Offender).

Example 3: Suppose an Incident Report was submitted and a warrant had been issued for the offender’s arrest. The entry for this data element should be “H” (Warrant Issued). When the offender is arrested, the clearance for this incident should be updated to “F” (Cleared by Arrest – Adult).

DATA ELEMENT # 6**CLEARANCE DATE****DATA FORMAT:** 8 Characters Numeric**CODING STRUCTURE:** Enter the date the incident was cleared. If “U” (Unknown) or “T” (Investigation Pending) is entered in Data Element #5 (Case Clearances), or if Data Element #5 is blank, this data element should be valued at zero.**NOTE:** In multiple offense incidents, the earliest date of clearance either by arrest or exceptional clearance for any offense clears the incident. Subsequent updates on clearances for other offenses in that incident will not be tallied as clearances, since the initial clearance is valid for the entire incident.**POSSIBLE ENTRIES:**

Year-Month-Day YYYMMDD

EXAMPLE:

A homicide investigation is cleared when the person wanted for a murder is discovered dead on March 15, 2004. The entry for Data Element #5 should be “A” (Death of Offender) and the Clearance Date should be “20040315”.

DATA ELEMENT # 7**GEOCODE****DATA FORMAT:** 6 Characters Alpha/Numeric**CODING STRUCTURE:** Optional use of up to 6 characters of an alpha or numeric identifier to specify the station, division, or precinct where the incident occurred. If the entry is less than 6 characters, blank right-fill. Valid character combinations are any valid numeric character. If this field is not used, leave blank.**NOTE:** This code is beneficial for an agency to precisely identify the station, division, or precinct in which an incident occurs. The GEOCODE should be assigned by each individual agency.**DATA ELEMENT # 8****INCIDENT LOCATION ADDRESS*****DATA FORMAT:** 143 Characters Alpha/Numeric**CODING STRUCTURE:** Enter the Full Street Address, City, State, Zip Code (either the five or nine digit zip code), Latitude, and Longitude information of the location where the incident occurred. The Latitude and Longitude information is optional, but should be reported if available.

Below are the characters available for each entry.

Zip Code	9
Address 1	40
Address 2	40
City	30
State	2
Latitude	11**
Longitude	11**

** The Latitude and Longitude should be in Decimal Degrees. For example, the city of Columbus' center point measured in latitude and longitude would be identified as follows:

Latitude: 39.9592
Longitude: -82.9956

The maximum number of characters for latitude is 11. The maximum number of characters for longitude is 11. Signs and decimal places count toward the maximum number of characters. Latitude and longitude should be submitted in Decimal Degree format. Latitudes within the State of Ohio should fall within the following range: 18.91084 and 71.38269. Longitudes should fall in the following range: -66.94983 and -178.2278. Report as many decimal places as possible up to the maximum number of characters for the fields. Right justify, left blank fill any latitude or longitude entries that are less than the maximum 11 characters.

Leave blanks between any street address break (ex: 140bEbTOWNbST where b = blank). For any entry that is less than the full number of characters available, leave the trailer characters blank.

This address record collection will provide information to enable crime mapping of OIBRS data at the street level.

EXAMPLE:

43215bbbb140bEbTOWNbSTbbC
OLUMBUSbbbbbbbbbbbbbbbbbbbbOHbbbbbbbbbbbbbbbbbbbb (where b = blank)

This entry must be in one line in the extract record layout.

DATA ELEMENT # 70	NUMBER OF OFFICERS FROM OUTSIDE OF YOUR AGENCY WHO APPLIED FORCE
--------------------------	---

DATA FORMAT: 2 Characters Alpha/Numeric

CODING STRUCTURE: Enter the value that identifies the number of officers from outside of your agency who also applied force during the incident. For P or U entry, left justify blank right-fill.

NOTE: This data element is only to be reported for a use of force incident, otherwise leave blank. When a use of force incident is reported there must be an entry in this field.

POSSIBLE ENTRIES:

- 00-99
- P = Pending further investigation
- U = Unknown and is unlikely to ever be known

DATA ELEMENT # 71**DID THE OFFICER(S) APPROACH THE SUBJECT(S)?**

DATA FORMAT: 1 Character Alpha

CODING STRUCTURE: Enter the code that identifies whether the officer(s) approached the subject.

NOTE: This data element is only to be reported for a use of force incident, otherwise leave blank. When a use of force incident is reported there must be an entry in this field.

POSSIBLE ENTRIES:

Y = Yes
N = No
P = Pending further investigation
U = Unknown and is unlikely to ever be known

DATA ELEMENT # 72**WAS THIS AN AMBUSH INCIDENT?**

DATA FORMAT: 1 Character Alpha

CODING STRUCTURE: Enter the code that identifies whether the subject(s) ambushed the officer(s).

NOTE: This data element is only to be reported for a use of force incident, otherwise leave blank. When a use of force incident is reported there must be an entry in this field.

POSSIBLE ENTRIES:

Y = Yes

DATA ELEMENT # 73**INITIAL CONTACT CIRCUMSTANCES**

DATA FORMAT: 2 Characters Alpha/Numeric

CODING STRUCTURE: Enter the value that identifies the initial contact circumstances between the officer and the subject. For entries P and U, left justify blank right fill.

NOTE: This data element is only to be reported for a use of force incident, otherwise leave blank. When a use of force incident is reported there must be an entry in this field.

POSSIBLE ENTRIES:

NOTE: This data element can only be reported for a use of force incident, otherwise leave blank. The use of force incident number can be the same as an associated criminal report incident number, no matter if the criminal report is submitted separately from the use of force incident in the same or different OIBRS extract file.

POSSIBLE ENTRIES:

Criminal report incident number
P = Pending further investigation
U = Unknown/Not reported

EXAMPLE:

17-123456bbb (where bbb = blanks)

DATA ELEMENT # 76**OTHER LAW ENFORCEMENT AGENCIES ORI AND USE OF FORCE INCIDENT NUMBERS (IF APPLICABLE)****DATA FORMAT:**

21 Characters Alpha/Numeric

CODING STRUCTURE: If the use of force incident involved multiple law enforcement agencies, enter up to 4 other law enforcement agency ORI numbers and use of force incident numbers assigned by the other agencies. If the other use of force incident number is less than 12 characters, leave trailing characters blank.

NOTE: This data element can only be reported for a use of force incident, otherwise leave blank. If this field does not apply in a use of force incident or only 1 or 2 use of force incident numbers are reported, report all or remaining record positions as blank.

EXAMPLE:

OH099000017-123456bbb (where bbb = blanks)

OFFENSE SEGMENT

An Offense Segment (Data Elements #9-#19) is prepared for each of the offenses (up to 10) involved in the incident.

NOTE: A separate Offense Segment should be submitted for each ORC Offense Code reported for an incident.

At least one, but not more than 10 Offense Segment(s) must be submitted for each incident reported.

The data elements marked with an asterisk (*) represent the information that must be submitted for each incident. Depending upon the circumstances of the incident, other data elements may be required.

DATA ELEMENT # 1**ORI NUMBER***

DATA FORMAT: 9 Characters Alpha/Numeric

CODING STRUCTURE: Enter the 9 character NCIC Originating Agency Identifier (ORI) Number which has been assigned to each agency.

All ORI Numbers must begin with "OH".

DATA ELEMENT # 2**AGENCY INCIDENT NUMBER***

DATA FORMAT: 12 Characters Alpha/Numeric

CODING STRUCTURE: Enter the number assigned by the submitting agency to uniquely identify the incident. This number must be the same for all segments associated with the incident. If the Incident Number is less than 12 characters, leave trailing characters blank.

EXAMPLE:

123456789bbb (where bbb = blanks)

DATA ELEMENT # 9**ORC OFFENSE CODE***

DATA FORMAT: 9 Characters Alpha/Numeric

CODING STRUCTURE: Enter the ORC Offense Code in this field. This data element is to be used to enter the ORC Offense Code for up to 10 of the most serious offenses involved in the incident. A separate Offense Segment containing Data Elements #9 through #19 should be submitted for each offense involved in the incident. See Appendix A "ORC Offense Codes" table for a listing of the ORC offenses collected and submitted for Ohio IBR purposes. The ORC Offense Code will be translated to a NIBRS code at the State level.

If an offense is Attempted, enter the ORC Code for the offense attempted and enter "A" in Data Element #10 (Offense Attempted/Completed).

If a local code translates into an ORC Offense Code, submit the ORC Offense Code. **DO NOT** report traffic offenses.

The decimal point should not be included in this field.

NOTE: There should not be any duplicate entries. The only exception arises when multiple offenses of theft (2913.02 or any subsection thereof) or trafficking in persons (2905.32) occur which are associated with different larceny types. For example, if, in the same incident, a suspect snatches a woman's purse and then pocket-picks another, two theft offenses may be entered - one associated with purse snatching and one with pocket-picking. If a multiple larceny theft incident occurs with larceny type code 240, it can only be reported with either 23F or 23G in the same incident. All other scenarios with 240 must be reported as 240 only with all the items stolen listed in the Property Segment and all victims of the thefts linked to the 240. An example for trafficking in persons would be if 64A - Commercial Sex Acts and 64B - Involuntary Servitude were both committed in one incident, two 2905.32 offenses may be entered - one associated with commercial sex acts and one with involuntary servitude.

DATA ELEMENT # 10**OFFENSE ATTEMPTED/COMPLETED*****DATA FORMAT:** 1 Character Alpha**CODING STRUCTURE:** This data element is to be used to indicate whether each offense in the incident was completed or merely attempted. If there was more than one occurrence of the same offense within an incident and one was completed, then “Completed” must be entered.**POSSIBLE ENTRIES:**A = Attempted
C = Completed**EXAMPLE:**

During the same incident, Offender #01 raped Victim #001, and Offender #02 attempted to rape Victim #002 but had to leave the scene before the act was consummated because of arriving police. Since one rape was completed, “C” should be entered into the Offense Segment submitted for forcible rape.

DATA ELEMENT # 11**LARCENY TYPE****DATA FORMAT:** 3 Characters Alpha/Numeric**CODING STRUCTURE:** This offense-specific coding is necessary to delineate the Type of Larceny or Trafficking in Persons because the ORC Offense Code cannot determine it.

The Larceny Type options of 23A through 23H or 240 must only be entered if the ORC Offense Code (Data Element #9) is 2913.02 (Theft or any subsection thereof). The Larceny Type options of 64A or 64B must only be entered if the ORC Offense Code (Data Element #9) is 2905.32. Otherwise, leave blank.

Definition of Larceny: The unlawful taking, carrying, leading, or riding away of property from the possession, or constructive possession, of another person.**POSSIBLE ENTRIES:**

- 23A **POCKET-PICKING** – The theft of articles from another person’s physical possession by stealth where the victim does not usually become immediately aware of the theft.
- 23B **PURSE-SNATCHING** – The grabbing or snatching of a purse or handbag, etc., from the physical possession of another person. (NOTE: If more force was used than necessary to wrench the purse from the grasp of the person, then a robbery occurred rather than a purse-snatching.)
- 23C **SHOPLIFTING** – The theft, by someone other than an employee of the victim, of goods or merchandise displayed for sale.
- 23D **THEFT FROM BUILDING** – A theft from within a building that is either open to the general public or where the offender has legal access.
- 23E **THEFT FROM COIN-OPERATED MACHINE or DEVICE** – A theft from a machine or device that is operated or activated by the use of coins.

- 23G **THEFT of MOTOR VEHICLE PARTS or ACCESSORIES** – The theft of any part or accessory affixed to the interior or exterior of a motor vehicle in a manner which makes the item an attachment of the vehicle, or necessary for its operation.
- 240 **MOTOR VEHICLE THEFT** – Theft of a motor vehicle.
- 23H **ALL OTHER LARCENY** – All thefts, which do not fit any of the definitions of the specific subcategories of Larceny/Theft listed above. This offense includes thefts from fenced enclosures, thefts of bicycles, boats, bulldozers, airplanes, animals, lawn mowers, lawn furniture, hand tools, and farm and construction equipment. Theft of gasoline from a self-service gas station (to leave without paying) also applies here.
- 64A **COMMERCIAL SEX ACTS** – Select when ORC Offense Code is 2905.32 and victim is compelled to engage in sexual activity for hire, engage in performance that is obscene, sexually oriented, or nudity oriented, or be a model or participant in the production of material that is obscene, sexually oriented, or nudity oriented.
- 64B **INVOLUNTARY SERVITUDE** – Select when ORC Offense Code is 2905.32 and victim is subjected to involuntary servitude (not to include commercial sex acts).

DATA ELEMENT # 12

SUSPECTED OF USING*

DATA FORMAT:

1 Character Alpha

CODING STRUCTURE: This data element is to be used to indicate whether any of the suspects in the incident are suspected of consuming alcohol or using drugs/narcotics during or shortly before the incident; or of using a computer, computer terminal, or computer equipment to perpetrate the crime.

Up to three entries are allowed. If only one code applies, leave the other entries blank. If the reporting officer does not indicate the use of Alcohol, Drugs, or Computer Equipment, “N” (Not Applicable) must be entered. If “N” is entered, the other two values must be left blank.

POSSIBLE ENTRIES:

- A = Alcohol
- C = Computer Equipment
- D = Drugs/Narcotics
- N = Not Applicable

EXAMPLES:

Example 1: Witnesses to an assault reported that the victim and suspect were in a bar drinking beer when an argument broke out and the suspect attacked the victim with a knife. “A” (Alcohol) should be entered.

Example 2: A rape victim advised that her attacker bragged that he had been “freebasing” cocaine just prior to the incident. “D” (Drugs/Narcotics) should be entered.

Example 3: A medical supply warehouse was burglarized and large quantities of Methadone, Morphine, Benzedrine, and Valium were stolen. “D” (Drugs/Narcotics) should **not** be entered because, while the drugs were the object of the crime, there was no indication that the suspects used drugs or narcotics before or during the incident.

Example 4: A computer “hacker” used his/her personal computer and a telephone modem to gain access to a company’s computer and steal proprietary data. “C” (Computer Equipment) should be entered.

Example 5: A private residence was burglarized and a personal computer was stolen, along with other items. “C” (Computer Equipment) should **not** be entered because, while the computer was stolen, it was not used to commit the crime.

DATA ELEMENT # 13

LOCATION TYPE*

DATA FORMAT:

2 Characters Numeric

CODING STRUCTURE: Up to two location types may be entered for each offense. However, a primary location must be selected with it being the first entry. When entering two codes, the primary location should be the more general of the two. For example, if a robbery is committed on a college campus at a McDonald’s restaurant, “09” (College) should be entered as the primary location and “28” (Restaurant) should be listed as the secondary location.

If only one Location Code is applicable, the second entry should be valued at zero. However, zero is not a valid entry for the first location type.

EXAMPLES:

Example 1: At 7:30 a.m. on June 3, 2003, the police are dispatched to Morning Resting Place, a Jewish cemetery. The grounds keeper reported that overnight thieves entered the cemetery and stole copper gutters from the main building. The entry for Data Element #19 should be “N” (No Bias/Not Applicable) because there is no evidence that the incident was motivated primarily by bias towards Jews.

Example 2: Police were dispatched to an apartment where an individual complained he was receiving threatening phone calls. Upon arrival, the complainant, a white male, informed the officers that he was gay and that over the last two weeks the same voice was repeatedly calling him, stating that the complainant had been seen going into "gay bars" and, therefore, he would be assaulted. Data Element #19 should be coded as “41” (Anti-Male Homosexual) since threats were made to physically harm the victim because of his sexual orientation.

Example 3: As an officer is walking her “beat,” her attention is drawn to two individuals who are engaged in a shouting match. As the officer approaches, she overhears the two men, one white and the other black, shouting obscenities at each other. The argument concerns a parking space each believes he is entitled to. As the argument continues, a racial epithet is shouted by one of the men. At this point, the officer arrives at the scene and quiets the men. What appears to have happened was that one of the drivers had gotten to the parking space first but did not use his turn signal to indicate he was waiting to pull into the parking space. The second driver, coming upon what appeared to be an unoccupied parking space, proceeded to maneuver his car around the first driver's car and into the space. The argument then began. Data Element #19 should be coded as “N” (No Bias), because the argument only involved the issue of which driver deserved to get the parking space.

One of the questions officers should ask when investigating alleged bias incidents is: “Would the incident have taken place if both the victim and the suspect were of the same race, religion, ethnic origin, or sexual orientation?” If the answer is “Yes,” it is an “Unbiased Incident.”

PROPERTY SEGMENT

A Property Segment (Data Elements #20-#28) should be submitted for each Type of Property Loss (Data Element #20) involved in the incident. If Data Element #9 (ORC Offense Code) is a Group A Offense and a Crime Against Property or a Drugs/Narcotics Offense, a Property Segment must be submitted. A Property Segment may also be submitted for some Kidnapping and Gambling Offenses.

NOTE: If more than one type of property loss occurs, there should be separate Property Segments representing each Type of Property Loss (Data Element #20).

Up to seven Property Segments can be submitted for an incident.

* See Appendix A for a list of Crime Type classifications. All Group A Offenses with crime types classified as “P” (Property) require at least one Property Segment.

DATA ELEMENT # 1**ORI NUMBER*****DATA FORMAT:** 9 Characters Alpha/Numeric**CODING STRUCTURE:** Enter the 9 character NCIC Originating Agency Identifier (ORI) Number which has been assigned to each agency.

All ORI Numbers must begin with "OH".

DATA ELEMENT # 2**AGENCY INCIDENT NUMBER*****DATA FORMAT:** 12 Characters Alpha/Numeric**CODING STRUCTURE:** Enter the number assigned by the submitting agency to uniquely identify the incident. This number must be the same for all segments associated with the incident. If the Incident Number is less than 12 characters, leave trailing characters blank.**EXAMPLE:**

123456789bbb (where bbb = blanks)

DATA ELEMENT # 20**TYPE OF PROPERTY LOSS/ETC.****DATA FORMAT:** 1 Character Alpha/Numeric**CODING STRUCTURE:** If more than one Type of Property Loss applies, submit a separate Property Segment.**NOTE:** If a Property Segment is submitted, there must be an entry in this field.

If stolen property is recovered, the Property Segment identifying the property as stolen should not be deleted when the incident is updated for the recovery. The updated incident should include a Property Segment for the stolen property and a second Property Segment for the recovered property. Recovered property can only be reported without a corresponding Stolen Property segment for Counterfeiting/Forgery or Receiving Stolen Property offenses.

When determining whether to report incidental damage that occurs as a result of a burglary, larceny, etc., insubstantial damage such as a broken window, forced door, etc. should not be reported, but substantial damage should be reported. It is up to the reporting agency to determine whether the damage should be considered substantial.

When "5" (Stolen/Etc.) is reported for Fraud Offenses, intangible benefits should be reported as "54" (Other) in Data Element #21 (Property Description). Intangibles are anything that cannot be perceived by the sense of touch. They can be benefits or detriments. For example, a right or privilege, a promotion, or loss of reputation are intangible benefits.

POSSIBLE ENTRIES:1 = **None**2 = **Burned** (includes damage caused fighting the fire)

- 3 = **Counterfeited/Forged**
- 4 = **Destroyed/Damaged/Vandalized**
- 5 = **Stolen/Etc.** (includes bribed, defrauded, embezzled, extorted, ransomed, robbed, etc.)
- 6 = **Seized** (to impound property which was not previously stolen)
- 7 = **Recovered** (to impound property which was previously stolen)
- U = **Unknown**

EXAMPLES:

Example 1: In an arson incident, the entries might be “1” (None) - an attempt where no property was burned, “2” (Burned) - property burned, or "U" (Unknown).

Example 2: In a burglary incident, the entries might be “1” (None) - an attempted burglary, or structure was entered but no property was taken, “5” (Stolen/Etc.) - property was taken, “7” (Recovered) - property was recovered at the scene, or “U” (Unknown) - it is not known whether property was taken.

Example 3: If the same incident involved both an arson and a burglary, then the codes listed in Examples 1 and 2 above may be applicable, and a separate Property Segment should be completed for both the arson and the burglary.

Item (1) the stamp collection, was the most expensive property; and should be coded “09” (Art Objects, Antiques, and Other Precious Items). Items 2 through 10 become the remaining eight most valuable codable properties as follows: the jewelry should be entered as code “08”; the personal computer as code “17”; the silverware and microwave oven as “14”; the clothes as “11”; the TV and VCR as “19”; the cash as “01”; the typewriter as “18”; and the shotgun as “44”. Items (12) through (14) should be combined and entered as “54” (Other).

DATA ELEMENT # 22	PROPERTY VALUE
--------------------------	-----------------------

DATA FORMAT: 9 Characters Numeric

CODING STRUCTURE: Enter the total dollar value loss in whole dollars for all victims in the incident for each property description listed in Data Element #21. If the value is unknown, enter “000000001”. Intangible items should also be valued at “000000001” except for the more specific “Identity-Intangible” Property Description code which is to be valued at “000000000”. See Appendix D (Valuation of Stolen Property), for instructions on how to determine the value of stolen property.

All entries should be zero left-fill with no decimals.

All entries should be rounded to whole dollar amounts.

Up to 10 entries allowed. If there are less than ten property values, the remaining fields must be valued at zero. If Data Element #20 Type Property Loss is “1” (None), this field may be valued at zero.

NOTES: The values should match the Property Descriptions that are associated with each Property Segment in the incident. If more than ten types of property are involved, the values of the nine most valuable property types are to be entered; then, the total value of the remaining properties which were coded as “54” (Other) in Data Element #21 (Property Description) are to be entered.

If Data Element #21 (Property Description) is any of the following then a zero value is required for Data Element #22 (Property Value):

- 02 = Credit/Debit Cards
- 05 = Non-Negotiable Instruments
- 06 = Personal (Identity) Papers
- 62 = Documents/Personal or Business
- 66 = Identity-Intangible

EXAMPLES:

Example 1: Two victims had their bicycles stolen at the same time and place, one bicycle was worth \$300 and the other bicycle was worth \$150. “37” (Bicycles) should be entered into Data Element #21 and their total value “00000450” should be entered into Data Element #22.

Example 2: In Example 1 given for Data Element #21 (Property Description), the values for each specifically coded property should be entered as follows: “000010000” for code “09” (the stamp collection); “000005000” for code “08” (the jewelry); “000001800” for code “17” (personal computer); “000001500” for code “11” (the clothes); “000001300” for code “19” (the TV and VCR); “000001200” for code “14” (silverware and microwave oven); “000000350” for code “01” (the cash); “000000250” for code “18” (typewriter); and “000000150” for code “44” (shotgun). The value for Items 12 through 14 should be “000000100” for code “54” (Other).

Example 3: In Example 2 given for Data Element #21 (Property Description), since a determination of the property loss must await an inventory, “000000001” (Unknown) should be entered into Data Element #22 (Property Value). An updated Property Segment with appropriate property loss values should be submitted after the results of the inventory are learned.

DATA ELEMENT # 23	DATE RECOVERED
--------------------------	-----------------------

DATA FORMAT:

8 Characters Numeric

CODING STRUCTURE: Enter the Date of Recovery for each Property Description listed in Data Element #21, **ONLY** when Data Element #20 is “7” (Recovered). Otherwise, value at zero.

Recovery dates should match each of the up to ten Property Descriptions that are associated with each Property Segment in the incident.

If there is more than one Date of Recovery for the same Type of Property enter the earliest date.

If the Recovery Date is unknown, enter the date of the incident report.

POSSIBLE ENTRIES:

On March 28, 2003, a residence was burglarized. Two 10-speed bicycles were stolen. The first bicycle was recovered on July 1, 2003. On July 24, 2003 the remaining bicycle was recovered. The data entered into this data element for the Property Type “37” (Bicycles) should be “20030701” since that is the earliest date of recovery for this property type.

EXAMPLES:

Example 1: During a bank robbery, the suspect pointed a gun at a teller and demanded and received money. The robber also pistol-whipped a customer who stood in his way as he made his getaway from the bank. There were three victims, i.e., the bank (“F” - Financial Institution), the teller (“I” - Individual), and the pistol-whipped customer (“I” - Individual). Therefore, three Victim Segments should be completed with the proper Victim Type code entered into their respective Victim Segments.

Example 2: A suspect is arrested for selling drugs to an undercover officer. One Victim Segment should be submitted for this incident. The Victim Type should be “S” (Society/Public).

DATA ELEMENT # 42	AGE OF VICTIM

A “Resident” is a person who maintains his/her permanent home for legal purposes in the locality (i.e., town, city, or community) where the crime took place. State and county law enforcement agencies should base their determinations of residency on the town, city, or community where the crime occurred rather than their broader geographical jurisdictions.

NOTE: This data is reported for the purposes of the FBI’s Law Enforcement Officers Killed and Assaulted (LEOKA) data collection program.

EXAMPLE:

On July 14, 2010, a law enforcement officer working in conjunction with a state narcotics task force in a jurisdiction outside his/her own duty assignment was shot in the arm while serving a warrant on an individual known to be operating a methamphetamine lab. In reporting the incident, the agency covering the jurisdiction in which the incident occurred should indicate Data Element #46C = ORI – Other Jurisdiction because the law enforcement officer was assaulted in the line of duty outside his/her regular assigned jurisdiction. An example entry for this data element would be in the format OH0930100.

- 9 **OTHER** - A type of arrest not specified above.

EXAMPLES:

Example 1: A woman phones in a complaint of a prowler in her back yard. The arriving officer finds her husband (from whom she is separated and being divorced) hiding behind the garage. When the complainant knows the identity of the prowler, she produces an order of protection that specifies her husband is to vacate and absent him from the premises, and requests that he be arrested. Code as “1” (Complaint), should be used even though there was an order of protection, because the complaint initiated the incident.

Example 2: An officer observes a motor vehicle being operated in an erratic and unsafe manner, and after testing, arrests the driver for Driving Under the Influence (DUI). At booking, the officer discovers that the arrestee has outstanding bench warrants for previous parking violations. Code as “2” (Crime in Progress) as the DUI offense initiated the arrest.

Example 3: Based on an investigation, the victim testified before a grand jury resulting in the issuance of an indictment warrant, the subject was then arrested, arraigned, and released on bail. Proper coding is “3” (Warrant).

DATA ELEMENT # 55 **MULTIPLE ARRESTEE SEGMENTS INDICATOR**

DATA FORMAT: 1 Character Alpha

CODING STRUCTURE: This data element is to be used to indicate whether the apprehension of the arrestee resulted in the clearance of more than one previously reported incident within the jurisdiction served by the reporting agency. If so, it is important to indicate that there was only one arrestee responsible for the clearance of multiple incidents.

This is done by entering “C” (Count Arrestee) on the first Arrestee Report and “M” (Multiple) into all other Arrestee Reports of separate Incident Reports cleared by the same Arrestee.

If the Arrestee’s apprehension does not cause the arresting agency to submit multiple Arrestee Segments (for example, going back to previous Incident Reports which are now cleared by the apprehension of this arrestee), enter “N” (Not Applicable).

“C” and “M” should only be used when the submitting agency submits two or more arrestee reports for separate Incidents relating to the same arrestee.

This data element is to be used to ensure that an arrestee is counted (scored) only once when the arrestee's apprehension causes the arresting agency to submit two or more Arrestee Segments concerning separate Group A Incident Reports. In such a situation, “C” (Count Arrestee) is to be entered into one of the Arrestee Segments and “M” (Multiple) is to be entered into all of the remaining Arrestee Segments. If the Arrestee's apprehension does not cause the arresting agency to submit multiple arrestee segments, enter “N” (Not Applicable). The “C” and “M” should only be used when the submitting agency submits two or more arrestee segments relating to the same arrestee.

NOTE: If an Arrestee Segment is submitted, there must be an entry in this field.

POSSIBLE ENTRIES:

N = Not Applicable
C = Count Arrestee
M = Multiple Arrestee Segment Indicator

EXAMPLES:

Example 1: The arrestee's apprehension for robbery resulted in his/her identification as the perpetrator of five additional robberies within the arresting agency's jurisdiction. Six (6) Arrestee Segments should be submitted, i.e., one for each Incident Report. One (1) should have "C" (Count Arrestee) entered in Data Element #55 and five (5) should have "M" (Multiple Arrestee Segments Indicator) as an entry.

Example 2: The arrestee's apprehension resulted in the arresting agency submitting only one Arrestee Segment. "N" (Not Applicable) should be entered.

DATA ELEMENT # 56	ORC ARREST OFFENSE CODE
--------------------------	--------------------------------

DATA FORMAT: 9 Characters Alpha/Numeric

CODING STRUCTURE: The 9 character ORC Offense Code of the offenses(s) for which the arrestee was apprehended should be entered in this field. The up to 10 most serious arrest offenses should be entered in this field. Do not include the decimal point.

NOTE: There should be no duplicate entries. The only exception arises when multiple offenses of theft (2913.02 or any subsection thereof) or trafficking in persons (2905.32) occur which are associated with different larceny types. For example, if, in the same incident, an arrestee snatches a woman's purse and then steals a vehicle, two theft offenses may be entered - one associated with purse snatching and one with theft of a motor vehicle.

A valid ORC Offense Code (see Appendix A) must be entered in this field. The ORC Offense Code will be translated to a NIBRS code at the state level for FBI submission.

If an Arrestee Segment is submitted, there must be an entry in this field.

DATA ELEMENT # 57	ARREST LARCENY TYPE
--------------------------	----------------------------

DATA FORMAT: 3 Characters Alpha/Numeric

CODING STRUCTURE: This offense specific coding is necessary to delineate the Type of Larceny or Trafficking in Persons that cannot be determined using the existing data elements.

The Arrest Larceny Type options of 23A through 23H or 240 must only be entered if the ORC Arrest Offense Code (Data Element #56) is 2913.02 (Theft or any subsection thereof). The Arrest Larceny Type options of 64A or 64B must only be entered if the ORC Arrest Offense Code (Data Element #56) is 2905.32. Otherwise, leave blank.

NOTE: This data element must also be completed for any subsections of Theft.

Definition of Larceny: The unlawful taking, carrying, leading, or riding away of property from the possession, or constructive possession, of another person.

POSSIBLE ENTRIES:

- 23B **PURSE-SNATCHING** - The grabbing or snatching of a purse or handbag, etc., from the physical possession of another person. [NOTE: If more force was used than necessary to wrench the purse from the grasp of the person, then a robbery occurred rather than a purse-snatching.]
- 23C **SHOPLIFTING** - The theft, by someone other than an employee of the victim, of goods or merchandise exposed for sale.
- 23D **THEFT FROM BUILDING** - A theft from within a building that is either open to the general public or where the offender has legal access.
- 23E **THEFT FROM COIN-OPERATED MACHINE or DEVICE** - A theft from a machine or device that is operated or activated by the use of coins.

- 240 **MOTOR VEHICLE THEFT** - Theft of a motor vehicle.
Note: Code 240 is entirely numeric (two-four-zero)
- 23H **ALL OTHER LARCENY** - All thefts that do not fit any of the definitions of the specific subcategories of Larceny/Theft listed above.
- 64A **COMMERCIAL SEX ACTS** – Select when ORC Offense Code is 2905.32 and victim is compelled to engage in sexual activity for hire, engage in performance that is obscene, sexually oriented, or nudity oriented, or be a model or participant in the production of material that is obscene, sexually oriented, or nudity oriented.
- 64B **INVOLUNTARY SERVITUDE** – Select when ORC Offense Code is 2905.32 and victim is subjected to involuntary servitude (not to include commercial sex acts).

EXAMPLE:

In resisting arrest, a fugitive pulled a gun and fired two times in the direction of two police officers that were attempting to take him into custody. Neither officer was hit but both drew their weapons and returned the fire, killing the fugitive. The possible entries are "01" (Criminal Attacked Police Officer and that Officer Killed Criminal), "02" (Criminal Attacked Police Officer and Criminal Killed by Another Police Officer), or "06" (Criminal Resisted Arrest). As only one code can be entered, the code that best describes the incident (as determined by the reporting agency) should be used. In this case, the reporting agency entered "01".

** The Latitude and Longitude should be in Decimal Degrees. For example, the city of Columbus' center point measured in latitude and longitude would be identified as follows:

Latitude: 39.9592
Longitude: -82.9956

The maximum number of characters for latitude is 11. The maximum number of characters for longitude is 11. Signs and decimal places count toward the maximum number of characters. Latitude and longitude should be submitted in Decimal Degree format. Latitudes within the State of Ohio should fall within the following range: 18.91084 and 71.38269. Longitudes should fall in the following range: -66.94983 and -178.2278. Report as many decimal places as possible up to the maximum number of characters for the fields. Right justify, left blank fill any latitude or longitude entries that are less than the maximum 11 characters.

Leave blanks between any street address break (ex: 140bEbTOWNbST where b = blank). For any entry that is less than the full number of characters available, leave the trailer characters blank.

This address record collection will provide information to enable mapping of use of force data at the street level.

EXAMPLES:

Example 1:

43215bbb140bEbTOWNbSTbbC
OLUMBUSbbbbbbbbbbbbbbbbbbbbOHbbbbbbbbbbbbbbbbbbbb (where b = blank)

Example 2:

bbbbbbbbbUbb
bb (where b = blank)

This entry must be in one line in the extract record layout.

SECTION II
EXTRACT FILE LAYOUT

1. OPTIONS FOR PARTICIPATION

An agency may submit data via e-mail. In some cases the data may be submitted through an FTP site or by using a CD-R. **All submissions must be in ASCII format.** Requests for investigative and statistical information should be directed to the Office of Criminal Justice Services.

2. SUBMISSION SPECIFICATIONS

Submission files can be sent by e-mail. All e-mailed submissions should include a memo in the body of the e-mail with the agency name, the time period of the data submitted, and the number of records in the file.

Codes must be right justified with zero left-fill

Fields containing numeric data codes must be ASCII numeric fields, not packed decimal fields. These should be right justified with zero left-fill (unless otherwise specified) when there is data to be reported. For example, if Data Element 21 (Property Description) code is "01" (Money), value "01" would be entered, not "1" or "_1".

3. OVERVIEW OF SEGMENTS TO BE SUBMITTED

The data elements representing the Ohio IBR data structures have been grouped into eight distinct Segment Levels identified as Level 1, Level 2, etc. These eight Segment Level groupings provide the mechanism to report Incident-Based Reporting (IBR) data to the Ohio program.

Incident Reports are made up of multiple "Segments"

Each Offense Incident Report should be submitted to the IBR program using up to six (6) distinct records, each of which is referred to as a "segment" (Segments 1 through 6).

Each Use of Force Incident Report should be submitted to the IBR program using three (3) distinct records, each of which is also referred to as a "segment" (Segments 1, 7 and 8).

An Offense Incident Report may consist of many possible combinations of circumstances ranging from a simple one offense, victim, and suspect, to a complex set of multiple offenses, property losses, victims, suspects, and arrestees. In addition, each of the victims may not be involved in each of the offenses. Similarly with a Use of Force Incident Report, it may consist of many possible combinations of circumstances ranging from one subject and one officer to many subjects and many officers.

Offense Incident Report Segment Levels

There are six SEGMENT LEVELS within an Offense Incident Report. Position "1" of each record (Segment) will contain one of the following SEGMENT LEVEL codes (1-6) to indicate the type of segment being submitted. A brief description of each Segment Level is listed below:

LEVEL	DESCRIPTION
1	ADMINISTRATIVE SEGMENT
2	OFFENSE SEGMENT
3	PROPERTY SEGMENT
4	SUSPECT SEGMENT
5	VICTIM SEGMENT
6	ARRESTEE SEGMENT

Use of Force Incident Report Segment Levels

There are three SEGMENT LEVELS within a Use of Force Incident Report. Position "1" of each record (Segment) will contain one of the following SEGMENT LEVEL codes (1, 7 and 8) to indicate the type of segment being submitted. A brief description of each Segment Level is listed on the following page:

LEVEL	DESCRIPTION
1	ADMINISTRATIVE SEGMENT
7	SUBJECT SEGMENT
8	OFFICER SEGMENT

4. LINKAGES AND SEQUENCE OF SEGMENTS

Linkages

Each Offense Incident Report has one master segment, called the “Administrative Segment.” Connected to this segment are one or more Offense, Property (if applicable), Victim, Suspect and Arrestee (if applicable) segments. Each Victim Segment contains a pointer (i.e., link) to the applicable Offense Segment(s). For example, if there are 2 offenses, 3 victims, and 4 suspects, and one of the suspects was arrested, Victim #001 could be linked to Offense #02, Victim #002 could be linked to Offense #01, and Victim #003 might be linked to Offense #01 and Offense #02.

The following is an example of “Segment Level” sequencing:

LEVEL	SEGMENT
1	ADMINISTRATIVE
2	OFFENSE-01
2	OFFENSE-02
3	PROPERTY-01, if applicable
4	SUSPECT-01
4	SUSPECT-02
4	SUSPECT-03
4	SUSPECT-04
5	VICTIM-001
5	VICTIM-002
5	VICTIM-003
6	ARRESTEE-01, if applicable

If we follow the example in the paragraph titled “Linkages” from above, Victim Segments 001 through 003 would have pointers linking them to their associated offenses.

Each Use of Force Incident Report has one master segment, called the “Administrative Segment.” Connected to this segment are one or more Subject and Officer segments. Each Officer Segment contains a pointer (i.e., link) to the applicable Subject Segment(s). For example, if there are 2 officers and 3 subjects, Officer #01 could be linked to Subjects #01 and #02, and Officer #02 could be linked to Subject #03.

The following is an example of “Segment Level” sequencing:

LEVEL	SEGMENT
1	ADMINISTRATIVE
7	SUBJECT-01
7	SUBJECT-02
7	SUBJECT-03
8	OFFICER-01
8	OFFICER-02

Other required record

The **HEADER RECORD** of all submitted files will contain the ORI and records management system (RMS) provider information assigned to the submitting agency. The description of this record is found with the other segment descriptions in the Record Layout Section of this document.

If an agency is submitting data on behalf of another agency or agencies, the submitting agency must inform the OIBRS section of the Office of Criminal Justice Services which agencies and ORI's they will be submitting data for. The submitted data must be sorted by individual files for each agency.

5. CREATION OF MONTHLY FILES

Activity date

To standardize submittals to the state, it is requested that monthly files be sent containing segment additions, or deletions to the database for that month. You may want to include in your system an Activity Date as part of your records; identifying the most recent date that action (add, delete) was taken on the report. This Activity Date does not reflect the date the incident occurred, it refers to the date the incident was entered, or last modified in your system. You could then download everything having activity for the selected month. For example, if the extract program were run at 1 minute past midnight on the 20th (e.g., July 20), all incidents that had an activity date within the day boundaries for the previous complete month (e.g., June 1-30) would be unloaded. It does not matter that all incident reports that occurred during the month had not been entered. Those would be entered during the following month, to be included in the next month's submission.

Sending monthly files will tend to evenly distribute the amount of data over 12 months. It will also make it easier to keep track of files in the event that the State does not receive a particular month's submission for an agency.

Delayed monthly processing

It is suggested that all monthly submissions be delayed until the 10th of the month for the previous complete month's data. For data entry and validation purposes this will increase the likelihood that all the reportable incidents from the previous month will be included in the submission, and decrease the number of updates to the submitted data.

Example

An incident occurred on June 25 and was entered into your database on June 30. An arrest was made on July 3 that also resulted in an additional victim and other IBR data elements being updated for the incident report in your database. This supplemental report was added to your database on July 8.

Effect of Extracting June's data on July 1

In the above example, extracting the June data as soon as possible (e.g., July 1) will produce the following data processing activity:

- 1) The initial incident report's data would be extracted in the "June" file because of the June "Activity Date."
- 2) This data would not include the new victim and arrest because they were entered on July 8.
- 3) The State would add the original incident report data with an "A" (Add Incident Report) as entered in the June file.
- 4) When the July submission is subsequently extracted in August, a complete re-submission of the incident report is required because of the addition of another victim.
- 5) The incident report re-submission ("A" = Add Incident Report) would also require that a preceding "D" (Delete) be submitted to remove the previous IBR incident report.
- 6) The State would have to delete the original report and replace it with the updated report.

Contrast with delaying the Extract of June's Data until July 10

- 1) The June incident would not have been submitted in the "June" file because the Activity Date would have changed when the victim and arrest data were entered.
- 2) The "July" file would contain the complete initial incident report, and the incident would not be in the "June" file.

6. CURRENT YEAR CUTOFF

“Crime In The United States” Publication

The FBI prepares a yearly Uniform Crime Report showing crime activity for the months of January through December. The FBI allows a 3-month lag time to allow crime data not entered into the State’s computer system as of December 31 to be entered during the first 3 months of the next year. The State IBR program will be responsible for submitting incident data to the FBI. Data not reported to the State IBR program by the end of the 3-month lag period will not be included in the National UCR publication.

7. SEGMENT ACTION TYPES

The following SEGMENT ACTION TYPES must be used when submitting Offense Incident Reports and Use of Force Incident Reports. They only apply to the Administrative Segment of each incident. If a previously submitted Incident Report is being adjusted, the complete incident report would be resubmitted after first deleting the old incident. Both of these activities would be accomplished on the same monthly file.

Segment Action Type

“A” = ADD OFFENSE INCIDENT REPORT (Level 1):

Submit all known data at the time the incident is initially entered, including the appropriate SEGMENT LEVELS within the incident report. Use this “Segment Action Type” also to resubmit an entire Offense Incident Report previously reported to the State, but which had to be deleted and resubmitted because individual types of segments (Segment Levels) needed to be added, modified or deleted.

“F” = ADD USE OF FORCE INCIDENT REPORT (Level 1):

Use “F” to submit all applicable SEGMENT LEVELS within the use of force incident report. Use this “Segment Action Type” also to resubmit an entire Use of Force Incident Report previously reported to the State, but which had to be deleted and resubmitted because individual types of segments (Segment Levels) needed to be added, modified or deleted.

“D” = DELETE INCIDENT REPORT (Level 1):

Use “D” to delete all the segments associated with a previously submitted Incident Report that needs to be modified. To do this, send the Administrative Segment as a “D” (Delete), and all the associated segments of that incident will be deleted for Segment Levels 1 through 6. This also applies to Use of Force incidents, send the Use of Force incident’s Administrative Segment as a “D” (Delete), and all the associated segments of that Use of Force incident will be deleted for Segment Levels 1, 7, and 8.

8. RECORD LAYOUT

HEADER RECORD

This is the first record of the file. A new Header Record should precede each unique ORI in a file.

Note: The following descriptions refer to data element positions within the record, and not their physical location on the disk.

SECTION III
OHIO IBR DATA EDITS

INTRODUCTION TO DATA EDITS

This section is organized into three groups of edits: Incident Level Edits, Data Element Level Edits, and Offense Level Edits. The purpose of each level is outlined at the beginning of each section. The edits will be applied to all local agency data that is submitted to Ohio's IBR system. Participating agencies should incorporate the edits into their IBR systems to avoid receiving lengthy error reports. If a local agency's software performs these edits, no errors should be encountered during processing at the state level. Also the Crime Type edits in the Offense Level Section should be met.

INCIDENT LEVEL EDITS

This section describes the Ohio IBR Incident Level Edits. **INCIDENT LEVEL EDITS** validate the consistency of the incident as a whole to determine if all of the required segments and fields are submitted. This level of edits also validates the relationship between segments.

Overview of minimally required Ohio IBR segments for Offense Incidents:

OTHER INCIDENT LEVEL EDITS

1. Number of segments allowed per offense incident and arrest.

Administrative Segment - 1
Offense Segment - 10
Property Segment - 7
Suspect Segment - 99
Victim - 999
Arrestee - 99

Number of segments allowed per use of force incident.

Administrative Segment - 1
Subject Segment - 99
Officer Segment - 99

2. Duplicate offense incidents are not allowed, and duplicate use of force incidents are not allowed, but an offense incident number can match a use of force incident number.

An agency must use a unique “AGENCY INCIDENT NUMBER” for each offense incident submitted with Segment Action Type “A”. The same applies for each use of force incident submitted with Segment Action Type “F”. Note that an offense incident submitted can have the same “Agency Incident Number” as a use of force incident submitted, but it’s important that the correct Segment Action Type data is included in the applicable Administrative Segment line for each incident type.

3. Duplicate “keys” within a segment are not allowed.

There cannot be any duplicate segments having the same “keys.” Following are the keys (data elements) that must be unique for each segment submitted in an incident.

Offense Segment - **ORC OFFENSE CODE** (Data Element #9) *(see note below)
Property Segment - **TYPE OF PROPERTY LOSS/ETC.** (Data Element #20)
Suspect Segment - **SUSPECT SEQUENCE NUMBER** (Data Element #29)
Victim Segment - **VICTIM SEQUENCE NUMBER** (Data Element #39)
Arrestee Segment - **ARRESTEE SEQUENCE NUMBER** (Data Element #51)
Subject Segment - **SUBJECT SEQUENCE NUMBER** (Data Element #78)
Officer Segment - **OFFICER SEQUENCE NUMBER** (Data Element #90)

***NOTE:** The only exception to the ORC Offense code arises when multiple offenses of theft (2913.02 or any subsection thereof) or trafficking in persons (2905.32) occur which are associated with different larceny types. For example, if, in the same incident, a suspect snatches a woman’s purse and then pocket-picks another, two theft offenses may be entered - one associated with purse snatching and one with pocket-picking. If a multiple larceny theft incident occurs with larceny type code 240, it can only be reported with either 23F or 23G in the same incident. All other scenarios with 240 must be reported as 240 only with all the items stolen listed in the Property Segment and all victims of the thefts linked to the 240.

4. Victim references to offense codes must have applicable offense segments.

Each ORC offense code entered in Data Element #40 (Victim/ORC Offense Link) must have a corresponding Offense Segment. A victim cannot be connected to an offense when the offense itself is not present.

5. Each Offense Segment must have a Victim Segment linked to it.

Each offense segment must have at least one Victim(s) pointing to it via Data Element #40 (Victim Linked to ORC Offense Code).

6. Victims must be linked to Suspects.

If “I” or “P” is entered in Data Element #41, enter up to 10 victim/suspect relationships to correspond with all suspects listed in Data Element #29 (Suspect Sequence Number). If the Suspect(s) are unknown and “00” is entered in Data Element #29, “00” should also be entered in Data Element #49 (Victim/Suspect Link).

7. When an incident is Exceptionally Cleared (Data Element #5 (A-E)) or Cleared Otherwise a complete Suspect Segment must be submitted.

8. When an Incident is Exceptionally Cleared there should not be an Arrestee Segment.

If Data Element #5 (Case Clearances) is A-E, there should not be an Arrestee Segment submitted for the incident.

9. When an Incident is Cleared by Arrest, there must be an Arrestee Segment.

If Data Element #5 (Case Clearances) is F or G, there must be an accompanying Arrestee Segment.

10. The Victim/Suspect Relationships must reflect their implied relationships.

The sex of the victim and suspect must reflect the implied relationship. If the relationship of the victim to suspect was HR (Homosexual Partner), the victim’s sex must be the same as the suspect’s.

11. All date fields must be in a logical sequence.

The Report Date must not be earlier than the Incident Date and likewise, the Date of Arrest cannot be earlier than the Incident or Report dates. All dates must also be earlier than the date the file is processed by the state IBR program.

12. All Segments for an incident must be in numeric order.

Valid segment levels for offense incidents are 1 through 6 and they must be submitted in numerical order. Valid segment levels for use of force incidents are 1, 7 and 8 and they must be submitted in numerical order.

13. Each Officer Segment must have a Subject Segment linked to it.

Each Officer Segment must be pointing to at least one Suspect Segment via Data Element #100 (Officer to Subject Link).

OFFENSE LEVEL EDITS

This section describes the Ohio IBR Offense Level Edits. **OFFENSE LEVEL EDITS** validate the information that is submitted for specific offenses. There are two types of offense level edits. The first, **Crime Type**, validates the data submitted based upon three categories of crime: Crimes Against Individuals, Crimes Against Society, and Crimes Against Property. See Appendix A “ORC Offense Translation Table” for the crime type designations. The second, **Implied Edits**, verify that all of the implied information, based upon the nature of the offense, is submitted. For example, if a homicide is committed, the offense specific edits will verify that Data Element #18 (Type of Weapon/Force Used) and Data Element #46 (Aggravated Assault/Homicide Circumstances) are non-blank.

NOTE: All ORC Codes listed imply all subsections thereof.

CRIME TYPE EDITS

1. Crimes Against Individuals

- a. If Data Element #9 (ORC Offense Code) is a “Crime Against an Individual,” Data Element #41 (Victim Type) must be “I” (Individual) or “P” (Police Officer).

2. Crimes Against Society

- a. If Data Element #9 (ORC Offense Code) is a “Crime Against Society,” only one Victim Segment should be submitted for that offense code.
- b. Data Element #41 (Victim Type) must be “S” (Society/Public).
- c. Multiple victim types of Society/Public should not be submitted. The Victim Segment would have multiple offenses linked to it.

3. Crimes Against Property

- a. If Data Element #9 (ORC Offense Code) is a Group A Offense “Crime Against Property,” a Property Segment, with all appropriate fields completed, must be submitted. Any Group B Offenses that allow for a Property Segment will be identified in the Implied Edits section of this manual.
- b. If Data Element #9 (ORC Offense Code) is a “Crime Against Property,” Data Element #41 (Victim Type) must be “I” (Individual), “B” (Business), “F” (Financial Institution), “G” (Government), “P” (Police Officer), “R” (Religious Organization), “O” (Other), or “U” (Unknown).

IMPLIED EDITS – OFFENSE INCIDENT REPORTS

NOTE: The following edits should also be applied to the subsections of the code section listed, unless the subsection has its own implied edit. For incidents with multiple offenses that require a property segment, a property segment is valid if satisfied by at least one offense in the incident. Any ORC not listed here that appears in Appendix A only requires the minimum data element requirements for each incident.

GLOBAL EDITS – OFFENSE INCIDENT REPORTS

ILLOGICAL PROPERTY DESCRIPTION FOR THE OFFENSE(S) SUBMITTED

Property offenses identified below cannot have illogical property descriptions for stolen and/or recovered property. This includes “Window” submissions of recovered property. When the offense has fewer “allowable” values than “not allowed,” the allowable values are shown instead. These are indicated by “Yes” or “No” under the “Allowed” column. If multiple property offenses are submitted in an incident and one or more property offenses not listed below are present, then this edit is bypassed.

VICTIM CONNECTED TO AN INVALID COMBINATION OF OFFENSES

'Mutually Exclusive' offenses are ones that cannot occur to the same victim by UCR definitions. A 'Lesser Included' offense is one that is an element of another offense and should not be reported as having happened to the victim along with the other offense. 'Lesser Included' and 'Mutually Exclusive' offenses are defined as follows:

1. Murder - Aggravated assault, simple assault, and intimidation are all lesser included offenses of murder.

2. Aggravated Assault - Simple assault and intimidation are lesser-included offenses of aggravated assault.

NOTE: Aggravated assault is a lesser-included offense of murder, forcible rape, forcible sodomy, sexual assault with an object, and robbery.

3. Simple Assault - Intimidation is a lesser-included offense of simple assault.

NOTE: Simple assault is a lesser-included offense of murder, aggravated assault, forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, and robbery.

4. Intimidation - Intimidation is a lesser-included offense of murder, aggravated assault, forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, and robbery.

5. Negligent Manslaughter – Murder, aggravated assault, simple assault, and intimidation are mutually exclusive offenses. Negligent manslaughter involves "...the killing of another person through negligence." The assault offenses are characterized by "...unlawful attacks."

6. Forcible Rape - Aggravated assault, simple assault, intimidation, and forcible fondling are lesser-included offenses of forcible rape.

Incest and statutory rape are mutually exclusive offenses and cannot occur with forcible rape. The prior two offenses involve no force, while the latter involves forced action against the victim's will.

7. Forcible Sodomy - Aggravated assault, simple assault, intimidation, and forcible fondling are lesser-included offenses of forcible sodomy.

Incest and statutory rape are mutually exclusive offenses and cannot occur with forcible sodomy. The prior two offenses involve no force, while the latter involves forced action against the victim's will.

8. Sexual Assault with an Object - Aggravated assault, simple assault, intimidation, and forcible fondling are lesser-included offenses of sexual assault with an object.

Incest and statutory rape are mutually exclusive offenses and cannot occur with sexual assault with an object. The prior two offenses involve no force, while the latter involves forced action against the victim's will.

9. Forcible Fondling - Simple assault and intimidation are lesser-included offenses of forcible fondling.

Incest and statutory rape are mutually exclusive offenses and cannot occur with forcible fondling. The prior two offenses involve no force, while the latter involves forced action against the victim's will.

Note: Forcible fondling is a lesser-included offense of forcible rape, forcible sodomy, and sexual assault with an object.

10. Incest - Forcible rape, forcible sodomy, sexual assault with an object, and forcible fondling are mutually exclusive offenses. Incest involves mutually exclusive offenses. Incest involves no force, while the four above-listed offenses involve forced sexual relations against the victim's will.

11. Statutory Rape - Forcible rape, forcible sodomy, sexual assault with an object, and forcible fondling are mutually exclusive offenses. Statutory rape involves no force, while the four above-listed offenses involve forced sexual relations against the victim's will.
12. Robbery - Aggravated assault, simple assault, intimidation, and all theft offenses (including motor vehicle theft) are lesser-included offenses of robbery.

The chart on page 118 of the FBI's *NIBRS Volume 4: Error Message Manual* shows the NIBRS offenses that cannot occur to the same victim in the same incident. Records management systems used by Ohio law enforcement agencies need to look at the ORC to NIBRS offense translation to use that chart.

APPENDIX A
ORC OFFENSE CODES
(Arranged by ORC Offense Code)

INTRODUCTION TO APPENDIX A

Following is the list of Ohio Revised Code offenses to be reported in Data Element #9 (ORC Offense Code) and Data Element #56 (ORC Arrest Offense Code). When entering the Ohio Revised Code offense in these data elements, do not include the decimal point. Also listed below are the NIBRS translations and the Crime Type category. As you will notice, some of the NIBRS translations are conditional in that the translation from the ORC offense code to the NIBRS code may be based on data elements in addition to the ORC Offense code. The Crime Type category distinguishes Crimes Against Individuals, Crimes Against Society, and Crimes Against Property. Definitions of the Crime Types are as follows:

Crimes Against Individuals (I) - A crime in which the victim is present and directly involved in the offense.

Crimes Against Society (S) - A crime that represents the community or public's prohibitions of engaging in certain types of activity.

Crimes Against Property (P) - A crime in which the object of the offense is property. In most instances the victim is not present or directly involved in the offense. However, robbery, pocket picking, and purse snatching are notable exceptions.

NOTE: For incidents, all **ATTEMPTS** should be reported as the offense attempted and “A” should be entered in Data Element #10 (Offense A/C). For arrests, Attempt should be recorded as the ORC Arrest Offense Code Data Element #56. Also, in order to capture several offenses at the level of detail required by the FBI and to capture several offenses that Ohio does not have a state statute for, it was necessary to create several “dummy” offense codes. However, these are not new Ohio Revised Code offenses. They will only be used for Ohio IBR reporting purposes. These codes are as follows:

- 2151.00 = Runaway
- 2907.02AA = Sexual Assault with an Object
- 2913.00 = Wire Fraud
- 2913.02E = Embezzlement
- 2918.00 = Curfew/Loitering/Vagrancy

HATE CRIME REPORTING SPECIFICATIONS

HATE CRIME DATA COLLECTION GUIDELINES

Legislative Mandate to Report Hate Crime

In response to a growing concern about hate crimes, Congress, on April 23, 1990, enacted the "Hate Crime Statistics Act of 1990" (hereafter "Act"). As part of the UCR Program, the Act requires the Attorney General to establish guidelines and collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity, including where appropriate the crimes of murder, non-negligent manslaughter; forcible rape; aggravated assault, simple assault, intimidation; arson; and destruction, damage or vandalism of property." The Attorney General is required to begin acquiring hate crime data in calendar year 1990. The Attorney General has delegated her responsibilities under the Act to the Director of the FBI. The FBI's Uniform Crime Reports (UCR) Section has been assigned the task of developing the procedures for, and managing the implementation of, the collection of hate crime data.

Developing a Collection Approach

The primary emphasis in developing an approach for collecting national hate crime statistics was to avoid placing major new reporting burdens on contributing law enforcement agencies. To accomplish this goal the following decisions were made:

1. The hate crime collection will be an adjunct to the UCR collection.--Hate crimes are not separate, distinct crimes, but rather traditional offenses motivated by the offender's bias. For example, an offender may commit arson because of his/her racial bias. It is therefore, unnecessary to create a whole new crime category. To the contrary, hate crime data can be collected by merely capturing additional information about offenses being reported to UCR.

2. The types of bias motivation to be reported are limited.--There are, of course, many kinds of bias. Some of the more common kinds are those against race, religion, ethnicity/national origin, or sexual orientation. But, there are also biases against rich people, poor people, men who wear long hair and/or beards, people who dress oddly, smokers, drinkers, people with diseases such as AIDS, motorcycle gangs, "rock" musicians, etc. The types of bias to be reported to the FBI's UCR Section are limited to those mandated by the Enabling Act, i.e., bias based on "race, religion, sexual orientation, or ethnicity." Because "ethnicity" has been limited to whether a person is or is not Hispanic, the UCR Program adopted the term "Ethnicity/National Origin" to denote a broader meaning.

Although there are no comprehensive statistics on the incidence of hate crimes, the limited statistics being gathered in existing state and local hate crime programs indicate that the number of hate crimes reported annually throughout the United States should not constitute a major reporting burden. Hate crime reporting should not, therefore, require large new commitments of personnel and other resources by Federal, state, and local UCR data contributors.

Bias Motivation

The object of the collection is to indicate whether the offender was motivated to commit the offense because of his/her bias against a racial, religious, ethnic/national origin, or sexual orientation group. Because of the difficulty of ascertaining the offender's subjective motivation, bias is to be reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias. The specific types of bias to be reported are:

Racial Bias:

- Anti-White
- Anti-Black or African American
- Anti-American Indian or Alaskan Native
- Anti-Asian
- Anti-Multiple Races, Group
- Anti-Native Hawaiian or Other Pacific Islander

Religious Bias:

- Anti-Jewish
- Anti-Catholic
- Anti-Protestant
- Anti-Islamic (Moslem)

Anti-Other Religion
Anti-Multiple Religions, Group
Anti-Atheist/Agnosticism

Ethnicity/National Origin Bias:

Anti-Asian (e.g. Chinese, Japanese, Korean, Vietnamese, etc.)
Anti-Arab
Anti-Hispanic or Latino
Anti-Other Ethnicity/National Origin

Sexual Orientation Bias:

Anti-Male Homosexual (Gay)
Anti-Female Homosexual (Lesbian)
Anti-Homosexual (Gays and Lesbians), Bisexual, or Transgender (Mixed Group)
Anti-Heterosexual
Anti-Bisexual
Other Bias Incident (e.g. Anti-AIDS victim)

Anti-Disability

Anti-Physical Disability
Anti-Mental Disability

Gender Bias

Anti-Male
Anti-Female

Gender Identity Bias

Anti-Transgender
Anti-Gender Non-Conforming

Objective Evidence that the Crime Was Motivated by Bias

An important distinction must be made. The mere fact that the offender is biased against the victim's racial, religious, ethnic/national origin, and/or sexual orientation group does not mean that a hate crime was involved. Rather, the offender's criminal act must have been motivated, in whole or in part, by his/her bias.

Because motivation is subjective, it is difficult to know with certainty whether a crime was the result of the offender's bias. Therefore, before an incident can be reported as a hate crime, sufficient objective facts must be present to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias. While no single fact may be conclusive, facts such as the following, particularly when combined, are supportive of a finding of bias:

- (a) The offender and the victim were of different racial, religious, ethnic/national origin, or sexual orientation groups. For example, the victim was black and the offenders were white.
- (b) Bias-related oral comments, written statements, or gestures were made by the offender that indicate his/her bias. For example, the offender shouted a racial epithet at the victim.
- (c) Bias-related drawings, markings, symbols, or graffiti were left at the crime scene. For example, a swastika was painted on the door of a synagogue.
- (d) Certain objects, items, or things which indicate bias were used (e.g., the offenders wore white sheets with hoods covering their faces) or left behind by the offender(s) (e.g., a burning cross was left in front of the victim's residence).

- (e) The victim is a member of a racial, religious, ethnic/national origin, or sexual orientation group that is overwhelmingly outnumbered by members of another group in the neighborhood where the victim lives and the incident took place. This factor loses significance with the passage of time, i.e., it is most significant when the victim first moved into the neighborhood and becomes less significant as time passes without incident.
- (f) The victim was visiting a neighborhood where previous hate crimes had been committed against other members of his/her racial, religious, ethnic/national origin, or sexual orientation group and where tensions remain high against his/her group.
- (g) Several incidents have occurred in the same locality, at or about the same time, and the victims are all of the same racial, religious, ethnic/national origin, or sexual orientation group.
- (h) A substantial portion of the community where the crime occurred perceives that the incident was motivated by bias.
- (i) The victim was engaged in activities promoting his/her racial, religious, ethnic/national origin, or sexual orientation group. For example, the victim is a member of the NAACP, participated in gay rights demonstrations, etc.
- (j) The incident coincided with a holiday relating to, or a date of particular significance to, a racial, religious, or ethnic/national origin group (e.g., Martin Luther King Day, Rosh Hashanah, etc.).
- (k) The offender was previously involved in a similar hate crime or is a member of a hate group.
- (l) There were indications that a hate group was involved. For example, a hate group claimed responsibility for the crime or was active in the neighborhood.
- (m) A historically established animosity exists between the victim's group and the offender's group.
- (n) The victim, although not a member of the targeted racial religious, ethnic/national origin, or sexual orientation group, is a member of an advocacy group supporting the precepts of the victim group.

Cautions

1. Need for Case-by-Case Assessment of the Facts -- The aforementioned factors are not all-inclusive of the types of objective facts which evidence biased motivation. Therefore, reporting agencies must examine each case for facts that clearly evidence that the offender's bias motivated him/her to commit the crime.

2. Misleading Fact -- Agencies must be alert to misleading facts. For example, the offender used an epithet to refer to the victim's race, but the offender and victim were of the same race.

3. Feigned Facts -- Agencies must be alert to evidence left by the offenders that is meant to give the false impression that the incident was motivated by bias. For example, students of a religious school vandalize their own school, leaving anti-religious statements and symbols on its walls, in the hope that they will be excused from attending class.

4. Offender's Mistaken Perception -- Even if the offender was mistaken in his/her belief that the victim was a member of a racial, religious, ethnic/national origin, or sexual orientation group, the offense is still a hate crime as long as the offender was motivated by bias against that group. For example, a middle-aged, non-gay man walking

by a bar frequented by gays, was attacked by six teenagers who mistakenly believed the victim had left the bar and was gay. Although the offenders were wrong on both counts, the offense is a hate crime because it was motivated by the offenders' anti-gay bias.

5. Changes in Findings of Bias -- If, after an initial incident report was submitted, a contrary finding regarding bias occurs, the national file must be updated with the new finding. For example, if an initial finding of no bias was later changed to racial bias or a finding of racial bias was later changed to religious bias, the change should be reported to the FBI's UCR Section.

Definitions

To ensure uniformity in reporting nationwide, the following definitions have been adopted for use in hate crime reporting:

Bias - A preformed negative opinion or attitude toward a group of persons based on their race, religion, ethnicity/national origin, or sexual orientation.

Bias Crime - A criminal offense committed against a person or property that is motivated, in whole or in part, by the offender's bias against a race, religion, ethnic/national origin group, or sexual orientation group. Also known as "Hate Crime."

(Note: Even if the offender was mistaken in his/her perception that the victim was a member of the group he or she was acting against, the offense is still a bias crime because the offender was motivated by bias against the group.)

Bisexual - (adjective) Of or relating to persons who experience sexual attraction toward, and responsiveness to, both males and females; (noun) a bisexual person.

Ethnicity/National Origin Bias - A preformed negative opinion or attitude toward a group of persons of the same race or national origin who share common or similar traits, languages, customs, and traditions (e.g., Arabs, Hispanics, etc.).

Gay - (adjective) Of or relating to males who experience a sexual attraction toward, and responsiveness to, other males; (noun) a homosexual male.

Hate Crime - Same as "Bias Crime."

Hate Group - An organization whose primary purpose is to promote animosity, hostility, and malice against persons belonging to a racial, religious, ethnic/national origin, or sexual orientation group which differs from that of the members of the organization (e.g., the Ku Klux Klan, American Nazi Party, etc.).

Heterosexual - (adjective) Of or relating to persons who experience a sexual attraction toward, and responsiveness to, members of the opposite sex; (noun) a heterosexual person.

Homosexual - (adjective) Of or relating to persons who experience a sexual attraction toward, and responsiveness to, members of their own sex; (noun) a homosexual person.

Lesbian - (adjective) Of or relating to females who experience a sexual attraction toward, and responsiveness to, other females; (noun) a homosexual female.

National Incident-Based Reporting System (NIBRS) - The new unit-record reporting system that is being implemented to replace the traditional UCR Summary Reporting System (SRS). NIBRS provides for expanded collection and reporting of offenses, arrests, and their circumstances.

Racial Bias - A preformed negative opinion or attitude toward a group of persons who possess common physical characteristics (e.g., color of skin, eyes and/or hair; facial features, etc.), genetically transmitted by descent and heredity which distinguish them as a distinct division of humankind (e.g. Asians, blacks, whites, etc.).

Religious Bias - A preformed negative opinion or attitude toward a group of persons share the same religious beliefs regarding the origin and purpose of the universe and the existence or nonexistence of a supreme being (e.g., Catholics, Jews, Protestants, atheists, etc.).

Sexual Orientation Bias - A preformed negative opinion of attitude toward a group of persons based on their sexual attraction toward, and responsiveness to, members of their own sex or members of the opposite sex (e.g., gays, lesbians, heterosexuals, etc.).

Summary Reporting System (SR) - The traditional tally system that has been used since 1930 to collect UCR data.

Examples of Reporting Hate Crime Incidents

Example (1): While driving through a predominantly Mexican-American neighborhood, a black male stopped his car to repair a flat tire. A group of Mexican-Americans leaving a bar across the street accosted the driver and then attacked him with bottles and clubs. During the attack, the offenders called the victim by a well-known and recognized epithet used against blacks and told him that blacks were not welcome in the neighborhood. This incident would be reported as Anti-Black because the victim and offenders are of different races, the offenders used a racial epithet, and the facts reveal no other reason for the attack than the stated one, i.e., to keep blacks out of the neighborhood.

Example (2): A white juvenile male snatched a Jewish woman's purse, and in doing so, knocked her down and called her by a well-known and recognized epithet used against Jews. The offender's identify is not known. Although the offender used an epithet for Jews, it is not known whether he belongs to another religious group or whether his motive was anything more than robbery. Because the facts are ambiguous, agencies should not report this incident as bias motivated.

Example (3): Overnight, unknown persons broke into a synagogue and destroyed several religious objects. The perpetrators left a large swastika drawn on the door and wrote "Death to Jews" on a wall. Although valuable items were present, none was stolen. Report this incident as Anti-Jewish because the offenders destroyed religious objects, left anti-Semitic words and graffiti behind, and theft did not appear to be the motive for the burglary.

Example (4): A 29-year old Chinese-American male was attacked by a 51-year-old white male wielding a tire iron. The victim suffered severe lacerations and a broken arm. The incident took place in a parking lot next to a bar. Investigation revealed that the offender and victim had previously exchanged racial insults in the bar. The offender initiated the exchange by calling the victim by a well-known and recognized epithet used against the Japanese and complaining that the Japanese were taking away jobs from Americans. An Anti-Asian offense would be reported based on the difference in race of the victim and offender, the exchange of racial insults, and the absence of other reasons for the attack.

Example (5): An adult white male was approached by four white teenagers who requested money for the bus. When he refused, one of the youths said to the others, "Let's teach this [epithet for a gay person] a lesson." The victim was punched in the face, knocked to the ground, kicked several times, and robbed of his wristwatch, ring, and wallet. When he reported the crime, the victim advised he did not know the offenders and that he was not gay. The facts are ambiguous. Although an epithet for a gay person was used by one of the offenders, the victim was not gay.

Such epithets are sometimes used as general insults regardless of the target person's sexual orientation, and in this case the offenders' motivation appeared to be limited to obtaining money from the victim. Therefore, the incident would not be designated bias motivated.

Example (6): A small neighborhood bar frequented by gays burned down after being closed for the night. Investigation revealed that the fire was deliberately set, but there were no witnesses or suspects. Although the fire was deliberately set, the fact that the bar was frequented by gays may have been coincidental. Therefore, the

incident is not reported as bias motivated. Two weeks later, three white adult males were arrested on a tip from an informant. They admitted burning down the bar, saying they did it to keep gays out of the neighborhood. As a result, this incident should now be reported as a bias crime.

Example (7): Six black men assaulted and seriously injured a white man and his Asian male friend as they were walking through a residential neighborhood. Witnesses said that the victims were attacked because they were trespassing in a "black" neighborhood. An Anti-Multi-Racial Group bias incident should be reported because the victims and offenders were of different races and witnesses reported that the victims were attacked because they were not black.

Example (8): Overnight, an auditorium, which was being used by representatives of several religious denominations to hold an ecumenical conference, was vandalized by unknown subjects. Extensive damage was caused and statements, such as "There is but one true religion" and "Down with the nonbelievers," were spray painted onto the walls. An Anti-Multi-Religious Group incident should be reported because the offenders clearly evidenced their hostility against a group representing more than one religion.

APPENDIX D

GUIDELINES FOR PROPERTY VALUATION

GUIDELINES FOR PROPERTY VALUATION

When determining the value of stolen property, the following procedures are suggested:

- a. Use fair market value for articles that are subject to depreciation because of wear and tear, age, or other factors that cause the value to decrease with use.
- b. Use cost to the merchant (wholesale cost) of goods stolen from retail establishments, warehouses, etc. In other words, use the dollar value representing the actual cash loss to the victim without any markup or profit added.
- c. Use victim's evaluation of items such as jewelry, watches, and other similar goods that decrease in value slightly or not at all with age.
- d. Use replacement cost or actual cost to victim for new or almost new clothes, auto accessories, bicycles, etc.
- e. When the victim obviously exaggerates the value of stolen property for insurance or other purposes, common sense and good judgment will dictate a fair market value to be placed on the stolen items by law enforcement.

In most instances, the victim's evaluation can be accepted. Nonnegotiable instruments such as traveler's checks, personal checks, money orders, stocks, bonds, etc., should be scored as thefts, if stolen, but no value recorded. Again "hair splitting" refinements are unnecessary. Negotiable instruments such as bonds payable to the bearer, etc., are valued at the current market price at the time of theft.

Often, recovered property is in a condition different from what it was at the time of the theft. The market value at the time of recovery should be used even though it is less than at the time it was stolen.

An agency should only record the value of property stolen in its jurisdiction. Likewise, the value of property recovered will include only property originally stolen from its own jurisdiction. It does not matter who recovers the stolen property or where it was recovered. If it was stolen in one jurisdiction, that same jurisdiction reports the value of its recovery. This procedure applies to all stolen property including automobiles.
